

Security should be one of your most important considerations when specifying a window system.

The Vision 3000 system takes care of your concerns by being fitted as standard throughout the range with quality multi-point locking systems, coupled with optional locking handles and possible upgrade paths to enhance security.

Vision 3000 windows are fitted with the world renowned Maco Multi Trend multi-point locking system.

The Maco Multi Trend system ensures that windows:

- are easy to operate (please refer to fact sheet "Operating Forces")
- do not need subsequent adjustment
- are constructed using gear from a single fittings programme taken from a minimum stock of materials
- are constructed using Maco components that have enabled many window frame systems to meet the requirements of BS 7950 : 1997
- are easily upgradeable to security standard category WK2 of the European Standard DIN EN V 1627-30
- include handles and operating gear from one manufacturer (when specifying standard Maco Harmony handles) ensuring full compatibility

Performance

Vision 3000 windows have attained category WK2 security when tested in accordance with European Standard DIN EN V 1627-30.

Maco Multi Trend multi point locking systems enable many window frame systems to meet the requirements of BS 7950 : 1997
